Project managers, consultants and support staff needing a comprehensive understanding of all aspects of the project lifecycle along with the key management documents that should be created during each stage of a project.

The standard package inclusions

If you are contemplating attending this course based on your **previously** achieving success in your Prince2 practitioner exam, we would recommend starting with PRINCE2®7 Foundation due to the changes of terminologies and addition of new material in PRINCE2® 7. You will also need to ensure that you have access to a PRINCE2Agile® reference manual.

You will be provided with two sample practitioner exam papers. Answers and the rationale for answers (from the examiner viewpoint), will also be included. You will be introduced to examination techniques, understanding how the examiner “reasons” about correct and incorrect answers and how to use the eBook to find answers.

The costs of both Prince2Agile foundation and practitioner examinations are included in the course being attended.
